

Instructor:

Class, please give this TA your attention as they tell you about a survey we would like you to take. It has no effect on your grade, and I will never see your individual answers.

TA:

Hello, I apologize for reading to you from this script, but we are attempting to make sure that every student who fills out this survey receives the exact same instructions. We are asking you to fill out a voluntary survey that asks you about your educational background and thoughts about computer science. This survey will help us to improve our CS classes. Your name is not recorded on the survey, and it will not affect your grade in any way. A research assistant will record the responses from the anonymous surveys. Please read and sign the consent form if you agree to fill out the survey. When you are done, return the survey and consent forms to me in two separate stacks. Thank you.
